Hi gang--

Having just joined the Glowbugs list, I wanted to make sure I had the drill right and was in fact getting in. So if I get this message back, well, I

guess it worked.

And...that being the case, I wanted to ask the group if anyone in the group had or used the Visio product to draw schematics. It's the only draw/CAD product I've ever seen that included "canned" tube patterns in the clipart collection. I may even be responsible for that, as I sent them a suggestion (not really expecting to be taken seriously) that they add tube patterns to their standard component symbols library.

Quite apart from that, it's a terrific package for schematics, and I draw everything that I draw in it. I have a "standard" 2-stage tube audio amp for receivers in Visio format that anyone can have if they want it.

Just let me know.

Well, mebbe there will be some interest, and then I will just HAVE to  
ease up on the gemittencomputerpointingetypinstypeinterfac and ease back  
into some reality --- like a straight shootin' iron or gebugginspitzen  
device.....(:+}{}.....

Mebee a few other globuggers will be around tonight. I will fire up  
Big Bertha on 1802R5 at 0300Z (10pm EST) for an hour or so. Hope a few  
are around.....

Hi Jeff, and welcome to the list. I can't say I've ever heard of the Visio product, unless it was by another name. I know there has been interest in standardizing on a schematic format, but no decisions (or at least nobody told me!). Can you tell us a little about the product like cost, ease of use, rough idea of data file sizes, and which machines it runs on? Thanks, and welcome again.

Does anyone have information about pin connections and/or data for PA tube CV1883 ? I bought the tube from a hamfest couple of years ago but hasn't got no data. In the base of the tube there are also texts: "Made in England, STC, 4H/182E". It has filament of abt 6,3V (tried it).

Any information would be appreciated (pin connections, voltages, source for data etc.). From the amount of pins I could figure out that it's either triode or tetrode.

On Wed, 6 Mar 1996, you wrote....

<snip>

..... I wanted to ask the group if anyone in the group  
had or used the Visio product to draw schematics.

<snip>

I looked at the Visio product ("Visio Home") that came in the software bundle with  
our recent computer purchase, and it has nothing like schematic  
symbols. I would be curious to see if I could read/edit a file you  
created with yours, though. If you could zip/encode it I'd like to take  
a look, but don't post the attachment/encoded file to the list, mail  
direct.

TO Don Reaves-- (via the list)

I tried mailing you the Visio tube amp file, but the address you state in  
your signature came back as undeliverable. Any clues?
